Team 5 Meeting Minutes
Monday, February 6th, 2023

- Weekly sprint review and planning meeting
- Individual Updates:
    - **Thomas:** Asked question about professor access to repository and Jira in D2L, looking into BDD testing, meeting with Jeffrey over Figma Prototype, worked on ERD
    - **Jeffrey:** Looking over testing (Jest testing library for React), experimenting with Figma and sample mockups (reusable UI components), meeting with Thomas on Wednesday at 1:30pm, worked on ERD
    - **King:** Learning Python and Django (refresher) to help Chris, was unavailable due to military responsibilities
    - **Chris:** Basic Django and React structure set-up, add API authentication for security, digging into user side, working on cleaning up ERD, looking at core requirements
- Team agreed to stick to the month long sprint instead of subdividing it into two, two week long sprints.
- Pointing schema will follow a 1:1 ratio such that 1 point is equivalent to 1 day of work and so forth.
    - Any stories pointed above 5 will be broken down into smaller stories..
- The forecasted point total for this sprint is about 39 points.
- Sprint review will still be the weekly Monday meetings at 6pm EST.
- The goal for this sprint is to have basic functionality for the frontend and backend such that a user can login into the application and view their self-inputed data on their profile.
- Thomas and Jeffrey will work to complete a prototype wireframe by end of day Friday.
