Team 5 Meeting Minutes
Monday, April 10th, 2023

- Weekly sprint review meeting
- Individual Updates:
    - **Thomas**
        - Reviewing requirements for upcoming deliverables:
            - Final Programming Project (Sprint 3)
            - Final Programming Presentation & Demo
            - Research Paper and Presentation
        - Created tickets on Jira to recognize these requirements.
        - Going to start formatting the research paper tonight.
    - **Jeffrey**
        - Completed basic backend integration for the player information. Still trying to understand the difference between player and user entities.
        - Researched more Web Service APIs that can be implemented into the application with much more added complexity.
    - **Chris & King**
        - Wrapping up backend items and meeting later tonight to discuss..
- Jeffrey has a PR up that Chris will code review.
- Need to consider that the application must recommend other players to play games with.
- Main focus for this sprint is to complete player interaction, friends list/functionality, and recommended players algorithm.
- Next Steps:
    - Have the source code finished by next Monday.
    - Next week's focus is to complete the research paper and one presentation.
    - The last week will be to finish the last presentation.
    - Everything is due on the 26th.
